

Bhupesh Sharma

bhupeshsharmag9@gmail.com

Jodhpur, Rajasthan — GitHub — LinkedIn

Profile

Currently in 3rd Year of my Artificial Intelligence and Data Science undergraduate degree, passionate about software engineering, backend development, and machine learning. Building projects using Python, Django, C++, and JavaScript while following modular architecture, clean code principles, and Git-based workflows. Continuously strengthening computer science fundamentals through hands-on development and problem solving.

Education

M.B.M University, Jodhpur B.E. in Artificial Intelligence and Data Science	2024 – Present
Senior Secondary School (CBSE) Class XII: 89.4%	2023
Class X: 88%	2021

Skills

Languages: Python, C++, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Django, NumPy, Pandas, Matplotlib

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Design and Analysis of Algorithms

Development: Git, GitHub, Linux, REST APIs (Basics), Visual Studio Code

Software Engineering: Modular Architecture, Clean Code, Documentation, Error Handling

Projects

BIOS-Style Interactive Portfolio — GitHub — Live

- Engineered a developer portfolio that recreates the experience of interacting with a retro BIOS system instead of a conventional website.
- Implemented animated boot sequence, keyboard-driven navigation, modular UI components, responsive layouts, and a terminal-inspired user interface.
- Developed using Django with reusable templates, modular architecture, and clean separation of responsibilities.
- Combined software engineering principles with creative interface design to deliver an immersive user experience.

ATM Simulation (Console-Based, C++) — GitHub

- Developed a console-based ATM simulation featuring PIN authentication, deposits, withdrawals, balance inquiry, and transaction validation.
- Applied modular programming practices to improve readability, maintainability, and code organization.

Relevant Coursework

Data Structures and Algorithms, Design and Analysis of Algorithms, Database Management Systems, Computer Networks, Operating Systems, Web Technologies, Fundamentals of Statistical Inference

Areas of Interest

Software Engineering, Backend Development, Artificial Intelligence, Machine Learning, Data Science
